DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Darleen Stockley on March 16, 2005.

2. The application has been amended as follows:

In line 2 of claim 8, deleted "to be".

3. Claims 1, 7, 11, and 12 are canceled.

Allowable Subject Matter

4. Claims 2-6, 8-9, 13-22, and 24-26 are allowed.
5. Claims 2 and 13 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims and 4-6, 8-9, 15-16, 19-20, directed to the species of Figure 6, 7a, 8a, 9a, and 10a are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASONS FOR ALLOWANCE

6. The following is an examiner's statement of reasons for allowance: The prior art, either singly or in combinations, fails to anticipate or render obvious a plasma etching apparatus comprising: a reaction tube; a high frequency coil antenna comprising first and second winding elements located around the reaction tube and electrically connected to a power supply and a ground, and a third segment, continuously formed with the first and the second winding segments and successively extending between the first and the first and second winding segments, the third segment being closer to the outer circumference of the reaction tube than the first and second winding segments; a drive mechanism to move either the high frequency coil antenna or the reaction tube; a controller connected to the drive mechanism to control a relative moving speed between the high frequency coil antenna and the reaction tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Crowell whose telephone number is (571) 272-1432. The examiner can normally be reached on M-F (9:30 -6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Parviz Hassanzadeh can be reached on (571) 272-1435. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
